

MASTER OF EDUCATION IN LEARNING SCIENCES

Community-Driven University for a Sustainable World

**FACULTY OF EDUCATION,
LANGUAGE AND
COMMUNICATION**

**By Coursework
(Mixed Mode)**

**Intake:
February & October**

INTRODUCTION

Learning sciences or the science of learning is the study of how people learn. Findings from Learning Sciences are often used to guide the design of instructional practices and learning environments that enable effective learning. Learning sciences focuses on promoting instructional practices grounded on the scientific understanding of how humans learn.

Our **Master of Education in Learning Sciences** is interdisciplinary in nature, combining advanced knowledge and skills in the areas of cognitive sciences, instructional technology, and educational research in its curriculum framework.

Research in this area aims to uncover the complexities of human learning and cognition, exploring how knowledge is acquired in various formal and informal real-life contexts. It covers the issues and challenges faced by learners of all ages through the perspectives of cognitive science, socio-cultural studies, and educational psychology. Besides that, it examines the potential of technology to enhance meaningful learning experiences.

The Faculty of Education, Language and Communication, Universiti Malaysia Sarawak (UNIMAS) is the first in Malaysia to offer a graduate programme in Learning Sciences. The programme received its full accreditation status from the Malaysian Qualification Agency (MQA) in March 2014.
